Introduction

Froggies Token is a deflationary meme token that initially launched in November 2021, and has migrated to a new contract, \$FRGST, in October 2022 on the Binance Smart Chain.

Our main objective is to provide a meme token to the financial crypto system that provides direct utility and usability, such as direct purchases.

Our motto 'To the Moon and Never Back' stands for a stable price increase of the token through stable and trustable holders, and by providing sufficient liquidity so that we can Launch to the Moon and will never have to come back.

Our team consists of people from multiple origins, but the core-team is entirely based in Europe. Throughout the life cycle of Froggies Token none of our core-team members has made a profit on Froggies, all obtained funds were and will be directly reinvested into the project to be able to achieve our goals and secure our visions for \$FRGST.

Tokenomics

TOKENOMICS	RATIONAL
Token name Froggies Token	Froggies, a symbol of the Frog and its association with healthy growth, Bullish color and its bright look on the future
Token Ticker \$FRGST	Something clean and recognizable
Blockchain Binance smart chain	
Intial supply 100,000,000,000,000,000	At launch all \$Froggies tokens have been mined and are available. No more tokens can be mined from this contract
Burned at start 15,000,000,000,000,000	By burning 15% of the initial supply, we have secured to get a head start on reducing the number of tokens available in the Ecosystem.
4% Reflections	Reflection for our holders This entire tax is automatically redistributing \$FRGST to our holders. The more you hold, the higher your share of the 4% tax.
3% Marketing/Dev	Marketing/Development An important fund required for us to be able to keep building towards tomorrow by investing in marketing, utility, and partnerships. All of this is directly reinvested in the project and the team does not take any profits from this.
2% Liquidity pool	Helps us to strengthen our liquidity pool to be able to provide a less volatile price movement and to be able to provide higher demand.
1% \$FRGST burn	\$FRGST Automatically 1% of each transaction is transferred to our burn wallet making it a deflationary token, meaning it deflates the total available supply thus overtime will push the price per token up.

Utility

P2E

Our first utility will be to provide our holders with a possibility to earn while playing. Everlost is a vintage style game where you need to get your cosmonaut-Frog as far as possible. Will you survive, or will you get Everlost?

everlost.io is specially created for this P2E to give it its own place with more theme styled page. P2E is set to release November 2022, and our game developer will be working on making the game even more competitive and fun. Competitions will be organized where the best players will get rewarded for their journey through Everlost.

STAKING

A well-known term; Staking. We will build a staking platform where all our holders can stake their \$FRGST for a specific period and get more \$FRGST in return.

The goal of staking is to temporarily lower the supply, higher the demand, thus pushing the value of \$FRGST up. Another important feature about staking is that it shows the trust of our holders in the project by staking their tokens with us for a longer period.

APY to be decided, but we have reserved a part of the supply to be able to finance the staking

Utility

DEX

Develop a DEX where all memecoins meet and where projects can easily provide utility with a couple of clicks such as staking, NFT and P2E. A Dex entirely powered by \$FRGST.

ENTERTAINMENT

We will build an entertainment platform where crypto meets fun. The currency of this platform will be solely \$FRGST, driving the platform.

CASINO

There are certain things that won't be discussed in great detail nor providing too many ideas for other projects. We will never lose sight of this goal, which will set us apart from competing ventures and genuinely provide unique value and utility to space as we are dissapointed of only seeing the same uninteresting things.

The ultimate objective of froggie is to inspire innovation in the meme industry and develop to be among the biggest and most well-known tokens.

Short & long term vision

SHORT-TERM

We want to build a community of trust and respect for one another. By providing events on our socials and groups we will keep the community moving and interested in staying connected with us.

Our P2E will provide entertainment for all holders and allows them to earn \$FRGST while doing so. After our P2E is fully released we want to as soon as possible open the possibility of staking. Attractive APY's will provide our holders with the possibility to earn passive \$FRGST by locking their tokens. We will also implement a burn function into the staking platform which will support the burn of our token.

We are working hard every day to provide our brand with top-notch visuals which will attract more people to join the \$FRGST community.

LONG-TERM

During our journey, new innovations. We want to stand out as Memecoin and not blend in with the crowd. We have experience, and we can only learn more from the experiences we have had. With our marketing expertise and our top-notch programmers, the sky is the limit.

However, this is not only in our hands, and you as a community member can also help; we will always encourage social activity as well as providing feedback or suggestions for improvements; it is up to us as a community to boost the project as a whole, therefore implies that if we all work together, we will all win.

Who are we

For now the We consists of the Developers. Overtime all Community members becomes the We and We will all be part of a new way of thinking and utilization of Crypto currency as an Ecosystem to build and foster Communities and create synergies with likewise associations and partners

The Developers all live normal lives and will for now stay anonymous but will be revealed when the time is right

CORE TEAM

MASTER OF TOKEN

I was born in the North and have travelled the world, seen a lot and from there developed a good understanding of different cultures and global dynamics. Until now my focus has been to build and deliver on different corporate Programs. However, with the creation of the \$FRGST Community I hope to be part of something that we one day can consider as a "Legacy was built". As a private person I have a large family that I love and have been passionate about the blockchain and crypto space since 2017

MASTER OF COMMUNICATION

Throughout my career I have worked within Digital Marketing and Communication for large and small companies. Most recently I have worked within the world of Influencers. After many years chasing a career and working long hours, I decided enough is enough and I wanted to spend my life with my children as well as built something that I believe in. Using the blockchain technology as a tool to build a community that believes in sustainability is the thing, I have been waiting for without knowing it and the journey has just begun

MASTER OF FROG ARMY

I am Froggy, Leader of the Frog Army. Coming from a hidden realm with chaos and no believe in Community and Sustainability. I have decided that my new Endeavour and Frog Army will be established in the human world. I will raise a Frog Army stronger than seen before within the world of crypto and use that army to build a better world with equal opportunities for all. Come and join me as we Leap into the Future and the Moon goes without saying

CORE TEAM

CrazyX — COMMUNITY & ARCHITECT

As the name says, I am quite 'crazy', but in the crypto-space that is proven to be a good thing. My craziness allows me to provide ideas and solutions for the community and for Froggies Token. Most in the community know me as a person that is always there, and never turning away from any questions nor critics. I am a very open and honest person, and if anyone has an issue with FRGST, bring it on, I will solve it. I am working in the finance sector for over 10 years, and my interest for crypto has developed rapidly since 2018. I am very proud to be part of this amazing team and cannot wait to show the world what FRGST is capable of.

chopin — CMO & branding

My nickname derives from the fact that I enjoy classical music, with Chopin being my all-time favorite. I studied business and finance for three years with a concentration on competitive marketing and advertising. Additionally, I have a strong background in branding and aesthetics, which has always interested me. — I've been in the cryptocurrency space for a long time, and throughout that time, I've established a strong network and learned a tremendous amount about the specific marketing that goes along with it. It is obvious that froggies are different. We possess unique abilities and have only huge aspirations for the future.

DISCLAIMER

From a financial perspective \$FRGST is like all other Crypto currencies, and it is an opportunistic investment that involves a high degree of risk of financial loss. Investors must do their own due diligence and have the financial ability and understanding before investing in Crypto currency as well as understand the potential risks involved with investing.

There is no guarantee that past performance of the token is an indicator of future financial returns and that the market price reflects the underlying value of the initiatives behind the token. The Whitepaper outlines the Vision and plans of Collective Finance, but there are no guarantees that these objectives will be executed or achieved.

This Whitepaper and future communication through formal communication channels as well as informal (Telegram, Reddit, Facebook, Instagram, Discard, Twitter etc.) does NOT constitute any investment, financial or general purchasing advice and it is recommended that interested investors seek professional advice all depending on the level of experience within the space of Crypto currency.

The value of Crypto currency is based on an arbitrary value that individuals associate with it. The Crypto currency marketplace and its utilization is still being developed and can be complicated to understand. The prices have high volatility, and the fluctuations and market dynamics can be difficult to understand for newcomers and professional advice should be sought for before investing.
